DETAILED ACTION

1. Applicant's pre-appeal request for reconsideration filed on 12/06/06 of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 20 is rejected under 35 U.S.C. 102(b) as being anticipated by Komushi et al. (U. S. Patent 6,266,227).

As to claim 20, Komushi et al. discloses a circuit board (substrate 6, see figure 1) comprising:

first and second conductive layers (4, 5, column 4, lines 59-60) including first and second interstices (22, 3, column 4, lines 52-53),

the first interstice (3) has a plurality of first widths laying in a first plane, see figure 1,

the second interstice (2) having a second width laying in a second plane engaged with the first interstice (3) by a dielectric layer (1) disposed between the first

and second interstices (29) to form a capacitor (see figure 2); the first and second planes 9the planes of two elements 4, 5) are substantially parallel, and wherein the second width is substantially overlaps at least two of the plurality of the first widths.

Response to Arguments

2. Applicant's arguments with respect to claim 20 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Okamoto et al., Larson, Ishige et al., and Chitipeddi et al. disclose related art.
